

Maria Salazar

Full Stack Web Developer

mariatrinidadsalazarr@gmail.com | Phone: +58 4148013873 | Bolivar City, Venezuela

Full Stack Developer with experience in React, Redux, Node.js, Express, and other current technologies. I highlight my participation in the development of the MedConnect project, where I was able to practice teamwork, communication, adaptability, active listening, and above all, empathy. In addition to having a completed degree in civil engineering, which has provided me with a foundation in decision-making and planning.

TECHNOLOGIES

HTML, CSS, Javascript, React, Redux, Node.js, Express, PostgreSQL, Sequelize, Tailwind CSS, Redux Toolkit, Next.js.

PROJECTS

Full Stack Web Developer – MedConnect App

May 01 - Jun 01

Academic experience. Henry Bootcamp.

MedConnect App is a medical consultation management application, which includes: login, local and third-party authentication with Google, controlled forms, combined filters, image management with Cloudinary, email notification sending, integration of payment gateway with MercadoPago, admin panel, reviews and ratings, logical deletion. My main contributions were:

Design and develop the REST API with JavaScript, Node.js, and Express.

Implement email notification with Nodemailer.

Collaborate in the integration of the payment gateway with MercadoPago.

MedConnect App was developed with: Next.js, Tailwindcss, Redux toolkit, Node.js, Express, Postgresql, Sequelize.

Link to deployment: medconnectfront-production.up.railway.app

Full Stack Web Developer – Countries

Apr 10 - Apr 27

Academic experience. Henry Bootcamp.

Countries is a Single-Page Application where users can obtain information about different countries and the touristic activities to do in each country. They can access the country details, filter by continent and activities, as well as sort alphabetically and by population. It handles combined filters for this purpose. Additionally, it has a controlled form where users can create an activity and assign it to a specific country, adding details such as the season in which it can be done, duration in hours, and difficulty on a scale of 1 to 5.

Countries is a SPA developed with React.js and Redux on the frontend, and Node.js and Express on the backend. A relational database with PostgreSQL and the Sequelize ORM were used.

I am still working on improvements for this project.

Full Stack Developer – elviejoapuestas.com

Jan - Feb 2023

Freelance collaborator experience. El Viejo Apuestas Deportivas.

An informational website developed for El Viejo Apuestas Deportivas, displaying company publications, events, and news. Users can register and have local authentication, add articles to favorites, and contact the company via email. It includes an administration panel with defined access levels for regular users, content administrators, and superusers. It has a sitemap for SEO web positioning using XML files.

It is a dynamic website designed with HTML/CSS on the frontend and structured with Python, Django on the backend, using PostgreSQL as the database. It is deployed on a self-configured server with Ubuntu Server, Supervisor, Gunicorn, and Nginx for network access.

My main contributions were:

UI and frontend development with HTML/CSS

Design and development of the database architecture and models with PostgreSQL

Link to deployment: <http://elviejoapuestas.com/>

PROFESSIONAL EDUCATION
